Transforming Agriculture Through Execution Excellence

Quton Zimbabwe Ltd., a subsidiary of **mipl**, continues to empower cotton farmers through innovation, capacity building, and strong field execution.

Hybrid Seed Production Field Day – Gambuli Village, Mashonaland West, Zimbabwe

As part of our ongoing farmer development initiatives, the Quton team successfully organized a field day at Chinhoyi, showcasing the true potential of cotton hybrid seed production through best agronomic practices.

Farmers were trained on critical stages including:

- ✓ Crop establishment
- ✓ Rouging
- ✓ Controlled pollination
- ✓ Harvesting techniques

The event created a powerful platform for knowledge exchange, where farmers shared experiences and witnessed the direct impact of scientific farming practices and continuous field support.

At **mipl**, we remain committed to driving sustainable agriculture by combining innovation with execution excellence—ensuring better productivity, profitability, and prosperity for farming communities.
